

# Site Reliability Engineering

## What do SREs do?

### We're fire-fighters!

SREs solve real, urgent production issues, and make sure the root cause is fixed too!

### We're software engineers!

SREs develop the production and automation tools to improve system reliability and guard against attacks and vulnerabilities.

### We're architects!

SREs help software engineers design their applications to be scalable and reliable.

### We're problem solvers!

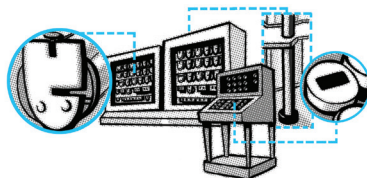

SREs are creative problem solvers!  
We deal with today's issues and work to prevent tomorrow's too!

### We're the backbone of Google!

SREs make sure that users can access Google's products -- 24/7/365¼!

### We're systems engineers!

SREs configure and monitor alerting systems so that we can detect when there are problems!
